

Pune Knee Course

SEVENTH

2017

Theme: Focus Meeting on ACL and Meniscus Injuries

INNOVATE & EDUCATE

All of us do the similar surgical procedure with a slightly different approach using our own tricks. What better platform to share these innovative tricks and tips other than the 7th Pune Knee Course!

We invite you to send a 4 minute video technique highlighting

- Why you felt the need of devising this technique?
- How did you go about the same?
- What difference did it make in your practice?

It need not be only surgical technique, but any trick or tip that has made a difference in your clinical practice. It could be a different way of diagnosing a problem, an unique clinical test that you have devised or a different approach that you have innovated.

You may send in the file of your presentation on email to stapasvi@gmail.com latest by **31st March 2017**.

The **2 best video techniques** selected by an Elite Panel in a blinded manner, will be invited for stage presentation at the **7th Pune Knee Course**.
